

EX.NO:1

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

Aim:

Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as one way, round trip, From, to, Departure, Travelers & Class, Fare Type, International and Domestic Flights etc.

PROCEDURE:

1. Log in to the **Zoho One** cloud platform using a valid account.
2. Open **Zoho Creator** from the Zoho One applications.
3. Create a new application named **Flight Reservation System**.
4. Create a new form named **Flight Reservation**.
5. Add a **Trip Type** field with options **One Way** and **Round Trip**.
6. Add a **Flight Type** field with options **Domestic** and **International**.
7. Add **From** and **To** fields to select the departure and destination locations.
8. Add **Departure Date** and **Return Date** fields for selecting the travel dates.
9. Add a **Travelers** field to enter the number of passengers.

10. Add a **Class** field with options such as **Economy, Premium Economy, Business, and First Class**. Add a **Fare Type** field with options such as **Regular, Student, and Senior Citizen**.
11. Add passenger details such as **Passenger Name, Email, and Phone Number**.
12. Create a **Flight Details** form containing Flight Number, Airline, Departure Time, Arrival Time, Fare, and Available Seats.
13. Create a **Flight Search/Booking page** to display available flights based on the user's selected details and allow the user to confirm a booking.
14. Test the application by entering sample flight details and verify that the reservation data is stored in the cloud, demonstrating the **SaaS (Software as a Service)** model.

Output:

The screenshot displays the 'FLIGHT RESERVATION' system interface. On the left is a dark sidebar with navigation options: 'Flight Reservations', 'Flight Booking', 'Flight Reservation', and 'Flight Reservations'. The main area is titled 'Flight Reservations' and features a form with fields for 'Trip Type' (One Way), 'From' (Bengaluru, Bengaluru, Karnataka, 560001, India), and 'To' (Chennai, Chennai, Tamil Nadu, 600001, India). Below these fields is a large empty space for additional details. At the bottom of the sidebar, the user's name 'Dony Bharath' is visible. On the right side, a 'Flight Details' panel is open, showing a table of reservation information:

Flight Details	
Trip Type	One Way
From	Bengaluru, Bengaluru, Karnataka, 560001, India
To	Chennai, Chennai, Tamil Nadu, 600001, India
Departure Date & Time	05-Oct-2026 10:30
Return Date & Time	31-Oct-2026 09:30
Number of Travelers	3
Class	Economy
Fare Type	Student
Flight Type	Domestic
Passenger Name	Dony Bharath D
Email	donybharath79@gmail.com
Phone Number	+91 90421 27199

Below the table, there is a link to 'Add a comment'.

RESULT:

The **Cloud-Based Flight Reservation System** was successfully created using **Zoho Creator** on the **Zoho One cloud platform**. The system allows users to select one-way or round-trip flights, choose domestic or international flights, enter travel details, select travelers, class and fare type, and store reservation details in the cloud. Thus, the application successfully demonstrates the **Software as a Service (SaaS)** model.
